

User Quick Start Guide

What you need to know to get started

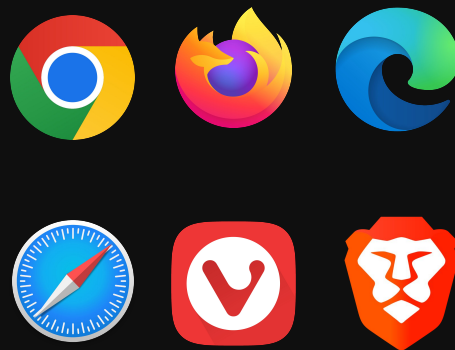

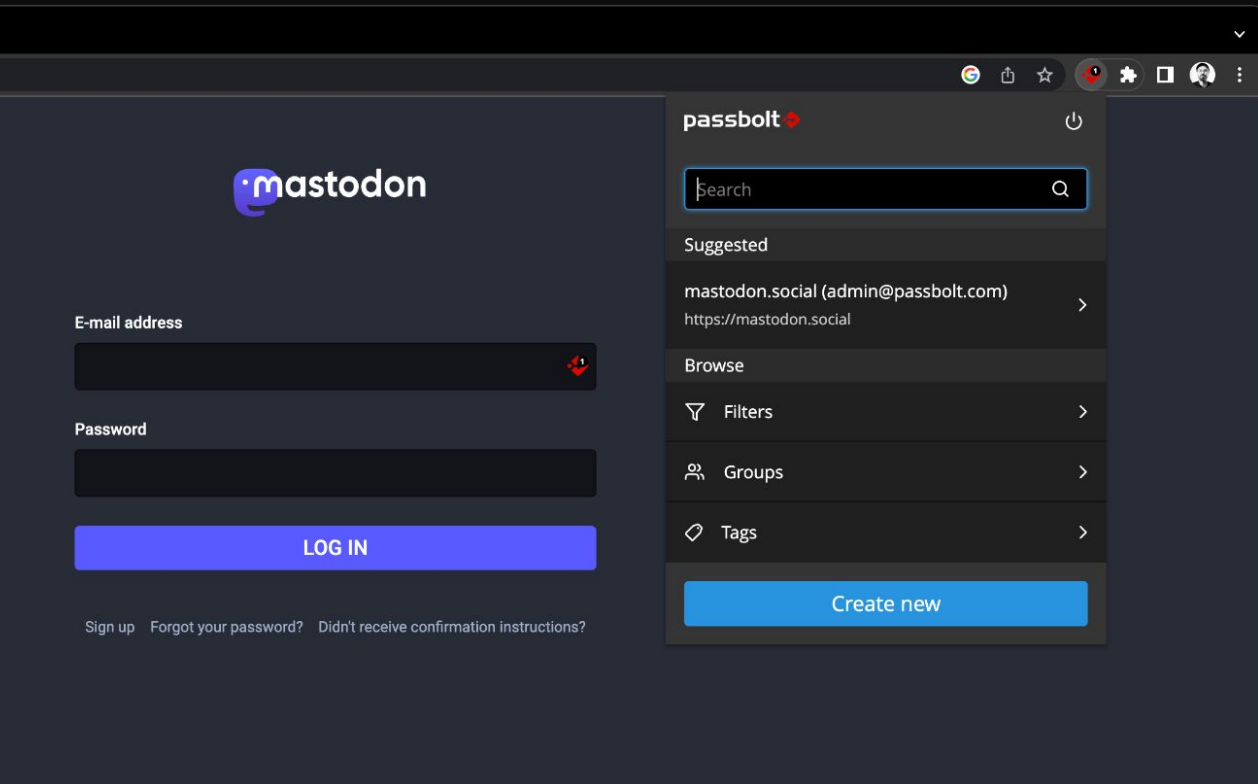

What is Passbolt?

Passbolt is a **password manager** designed for secure collaboration. You can think of it as a drive for your secrets.

It helps with **security** by reducing weak or reused passwords usage and also prevents phishing.

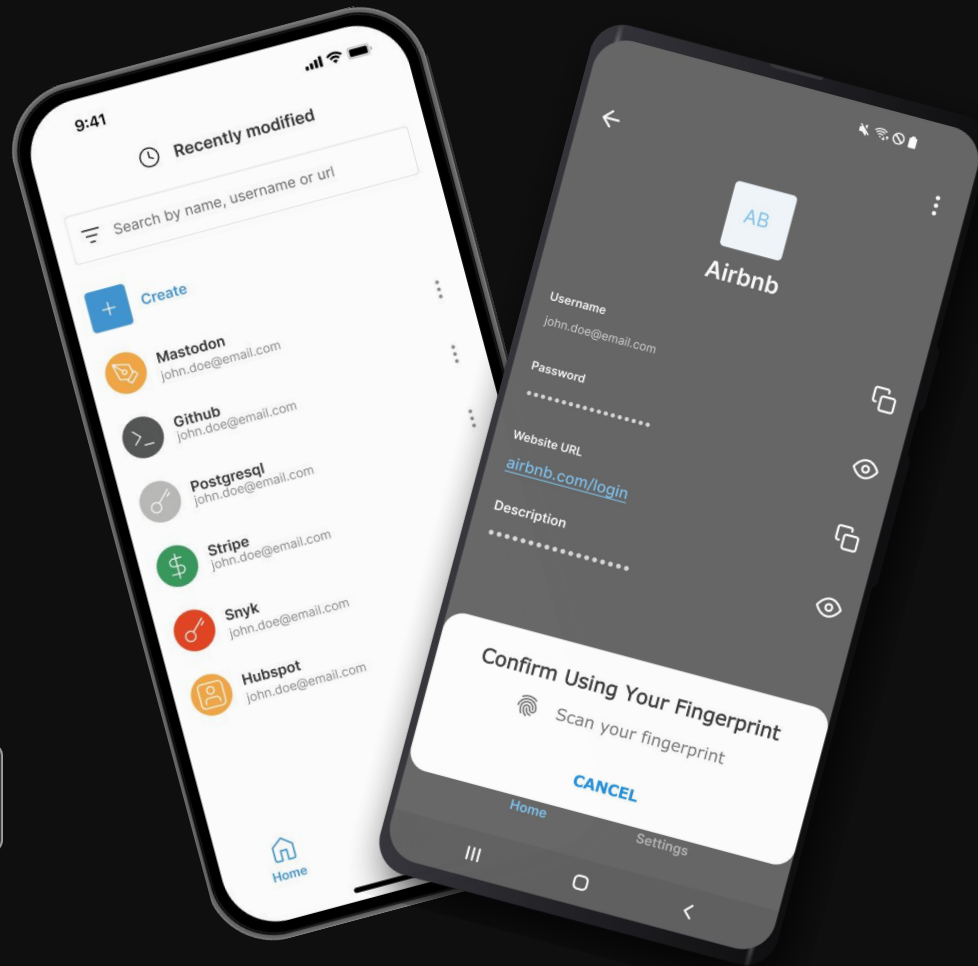

You can use Passbolt **browser extension** to generate and quickly fill out passwords & OTPs into forms.

And also access
Passbolt on mobile,
using **Android** and
iPhones apps.

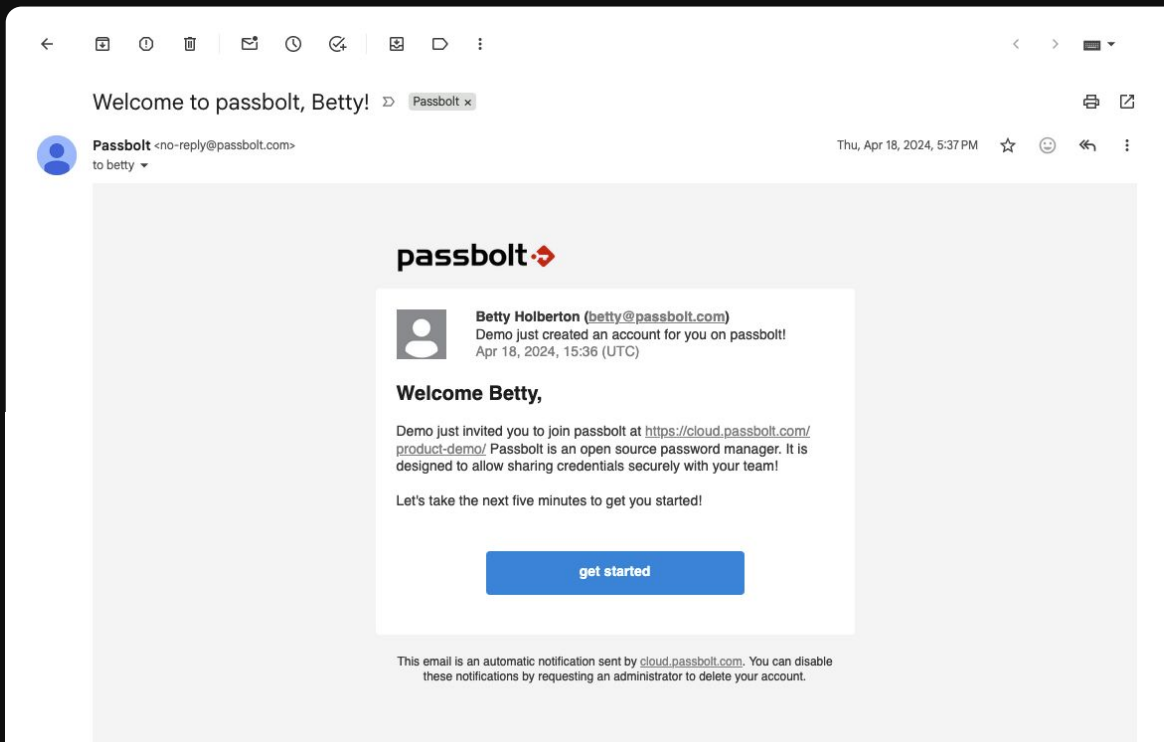

You can fill in credentials
quickly using Face ID or
fingerprints.

How do I get started?

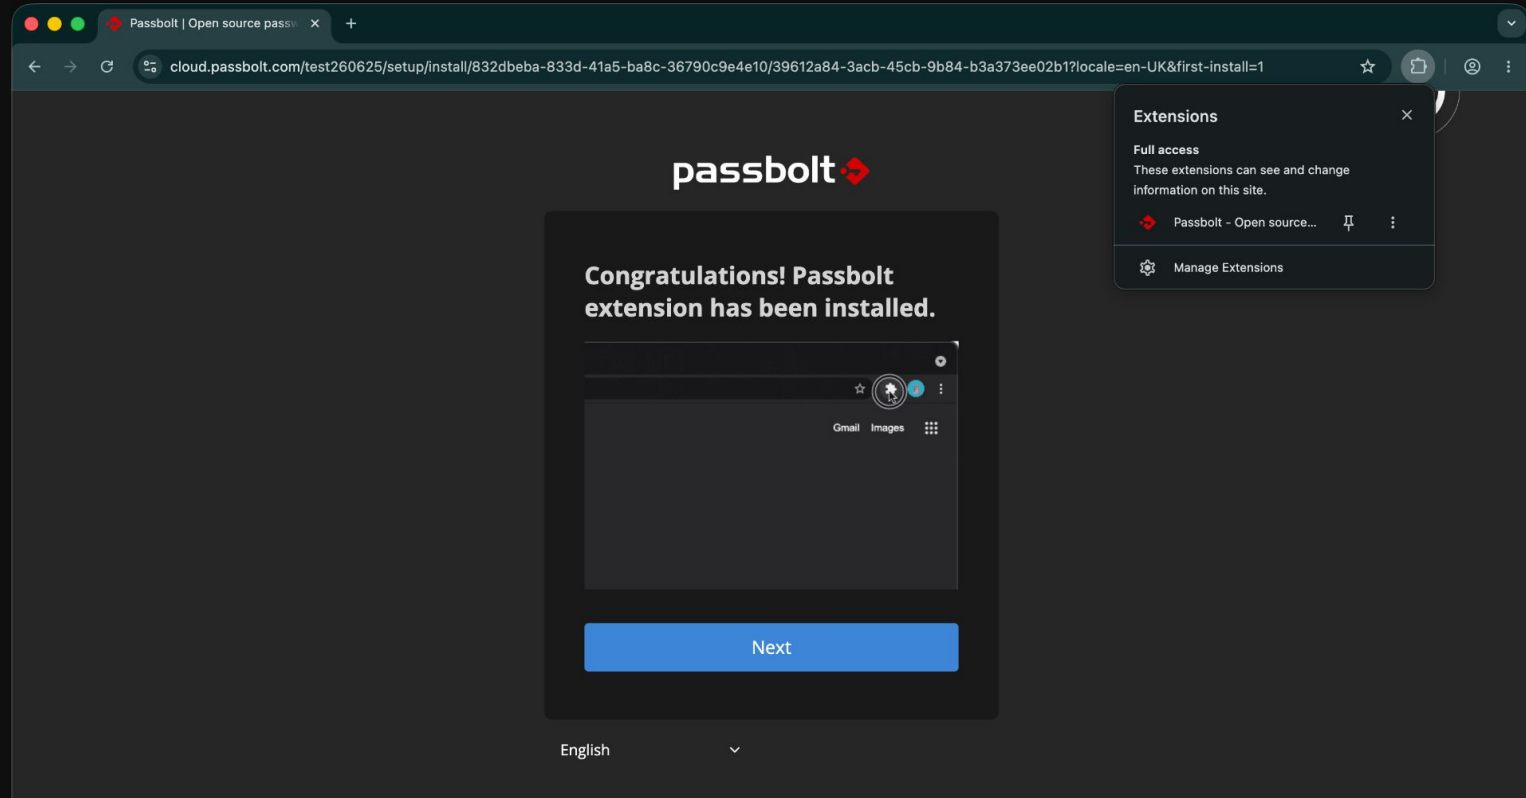

This is how the setup looks like

Step 1. Accept your **invitation**
Open the email sent by your administrator.

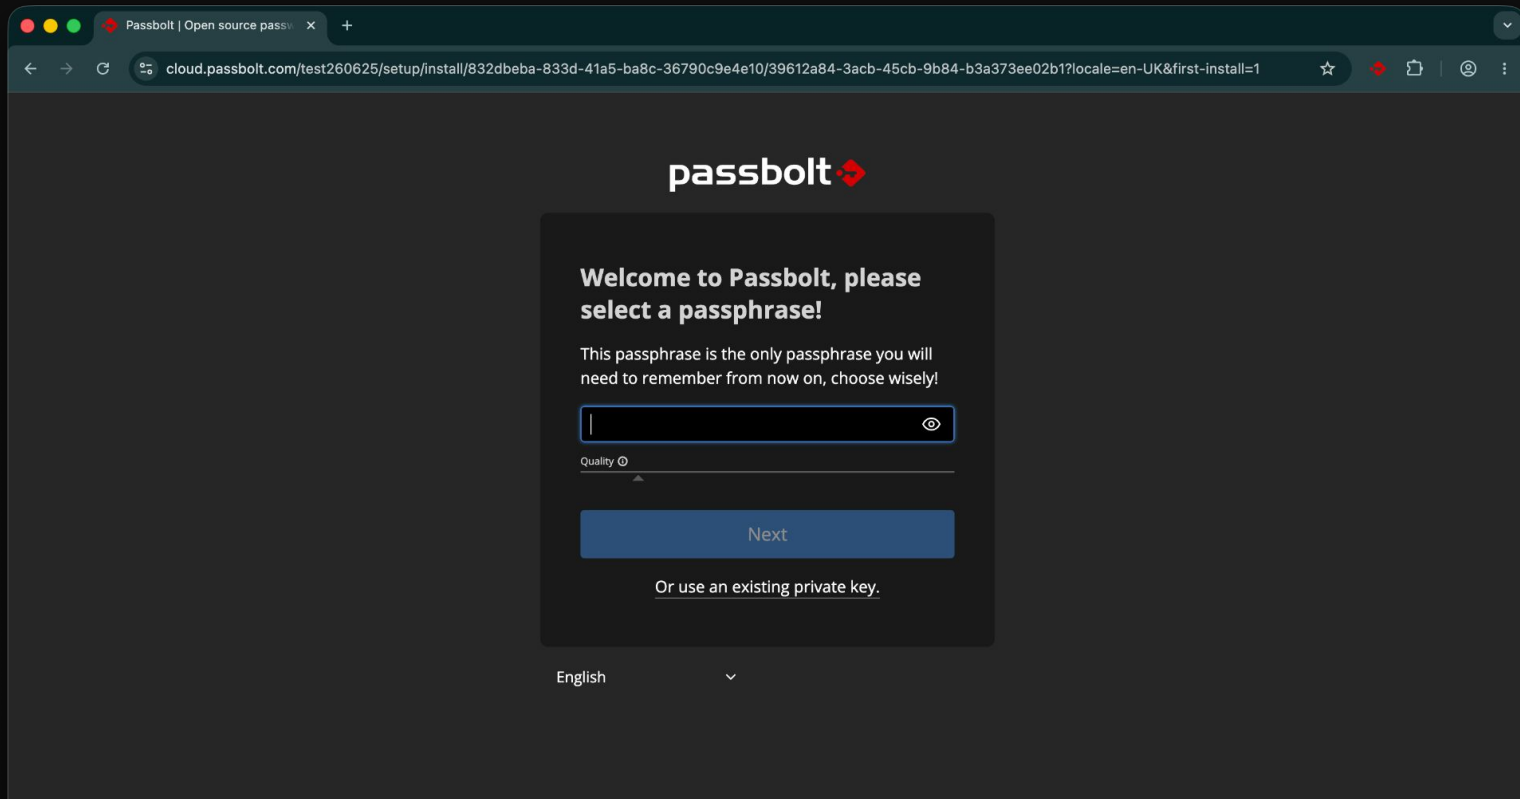

Step 2. Install the browser extension

Tip: Make sure you pin the add-on to your toolbar.

Step 3. Select a **passphrase**. It will lock on your encryption key, and it is used to encrypt your secrets and prove it's really you.

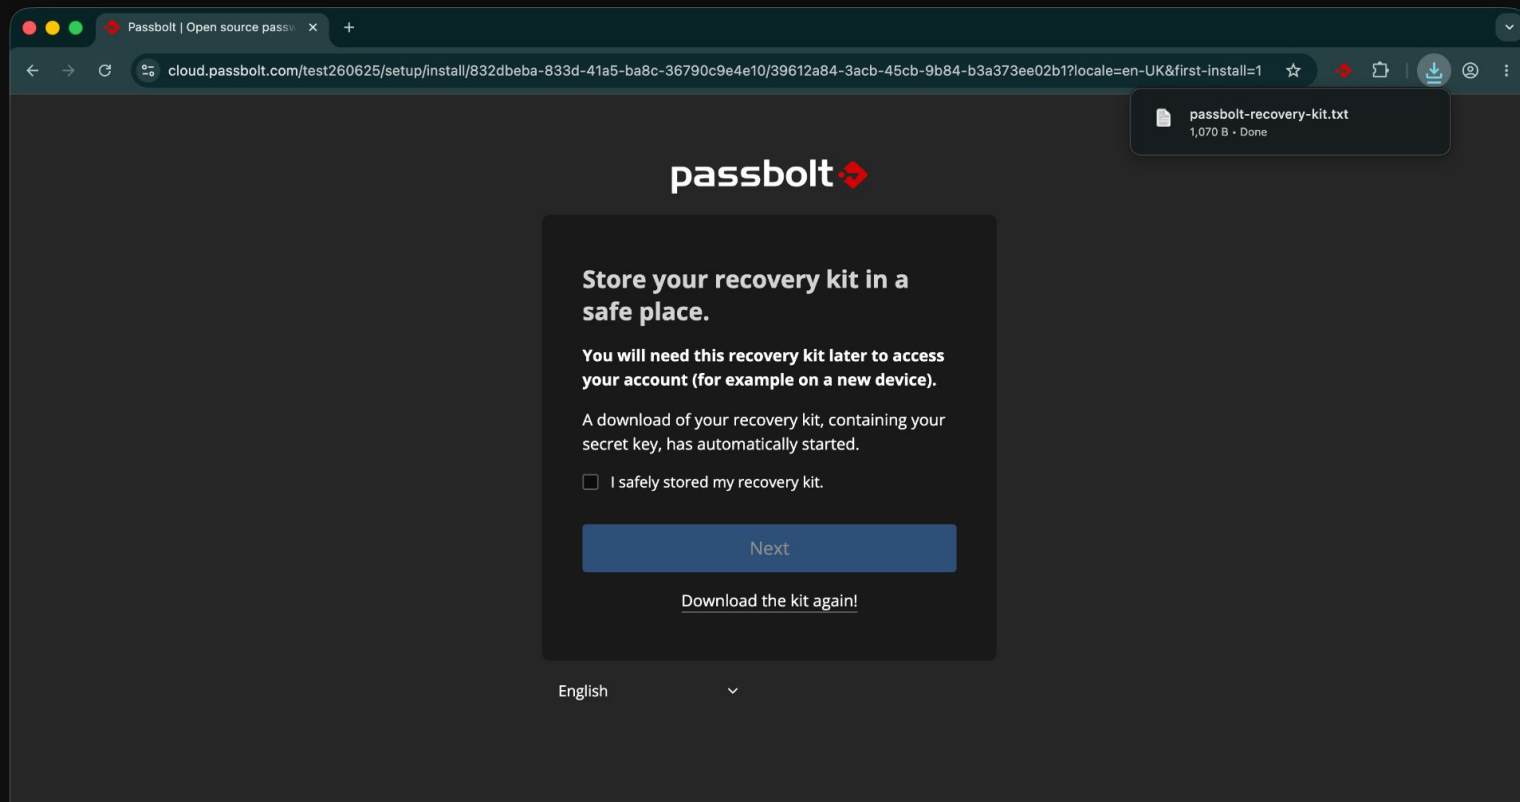

The screenshot shows a web browser window with the Passbolt logo at the top. The main content area is a dark gray box with the following text and elements:

- Welcome to Passbolt, please select a passphrase!**
- This passphrase is the only passphrase you will need to remember from now on, choose wisely!
- A text input field for the passphrase, with a blue border and a blue eye icon on the right.
- A "Quality" label with a small circular icon and a horizontal progress bar below it.
- A blue "Next" button.
- A link: [Or use an existing private key.](#)

At the bottom of the page, the word "English" is displayed next to a small downward arrow icon.

Step 4. Backup your **account recovery kit**

Tip: Store it in a safe place. You will need it if you forget your passphrase and if you change devices.

Beyond the setup

Three useful functionalities

The screenshot shows the Passbolt web interface with a 'Create password' modal dialog open. The background interface includes a sidebar with a 'My workspace' section and a main content area with fields for Name, URI, Username, Password, and Quality. The modal dialog has the following fields and controls:

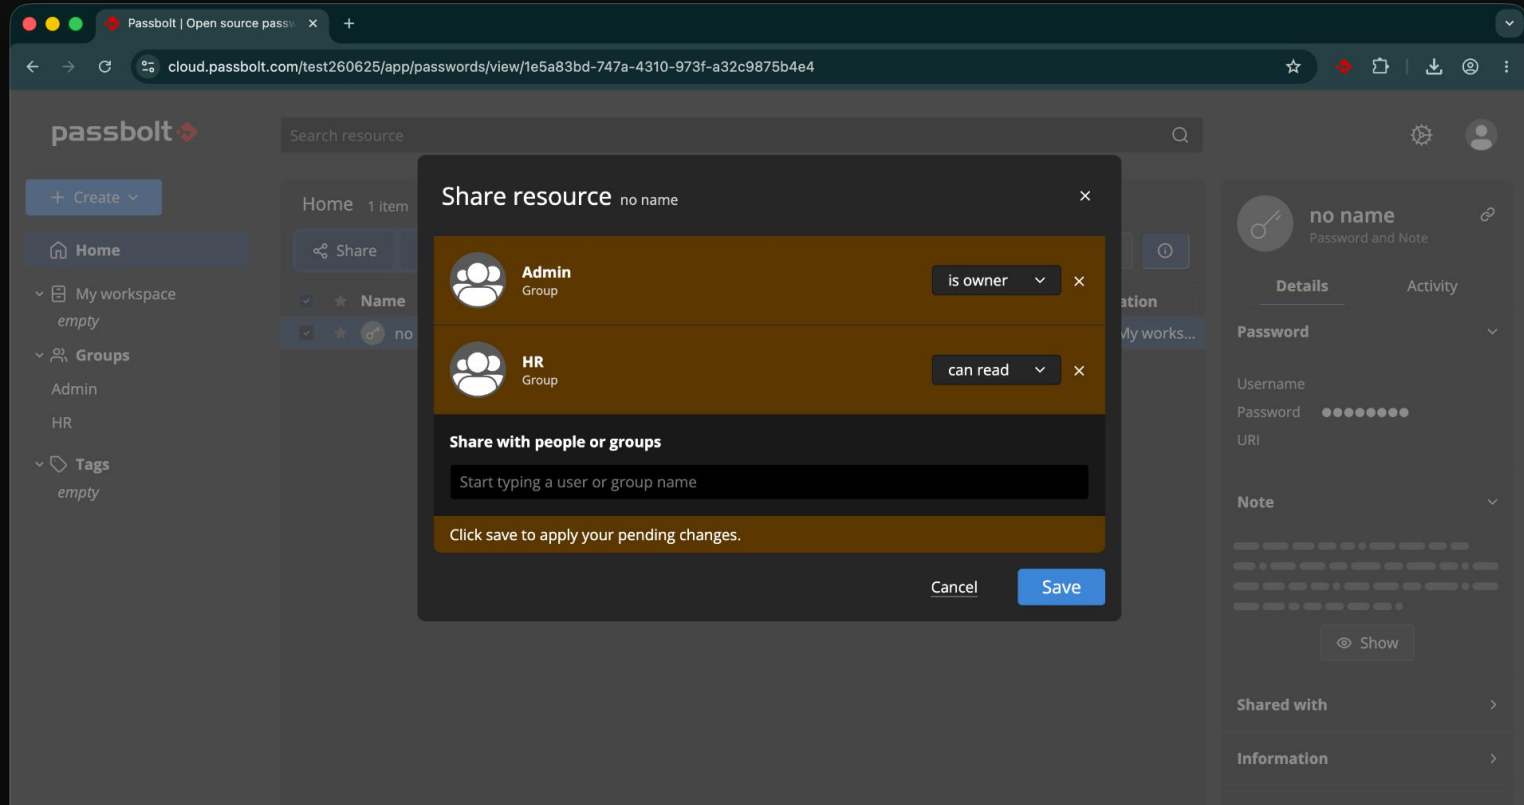

- Name ***: A text input field containing 'Passbolt | Open source password manager for'.
- URL**: A text input field.
- Username**: A text input field.
- Password ***: A password input field with a strength indicator showing 'Strong' and a green bar.
- Save**: A blue button at the bottom of the modal.

At the bottom of the main interface, there are 'Cancel' and 'Create' buttons. The footer contains links for 'Terms', 'Privacy', 'Credits', and a heart icon.

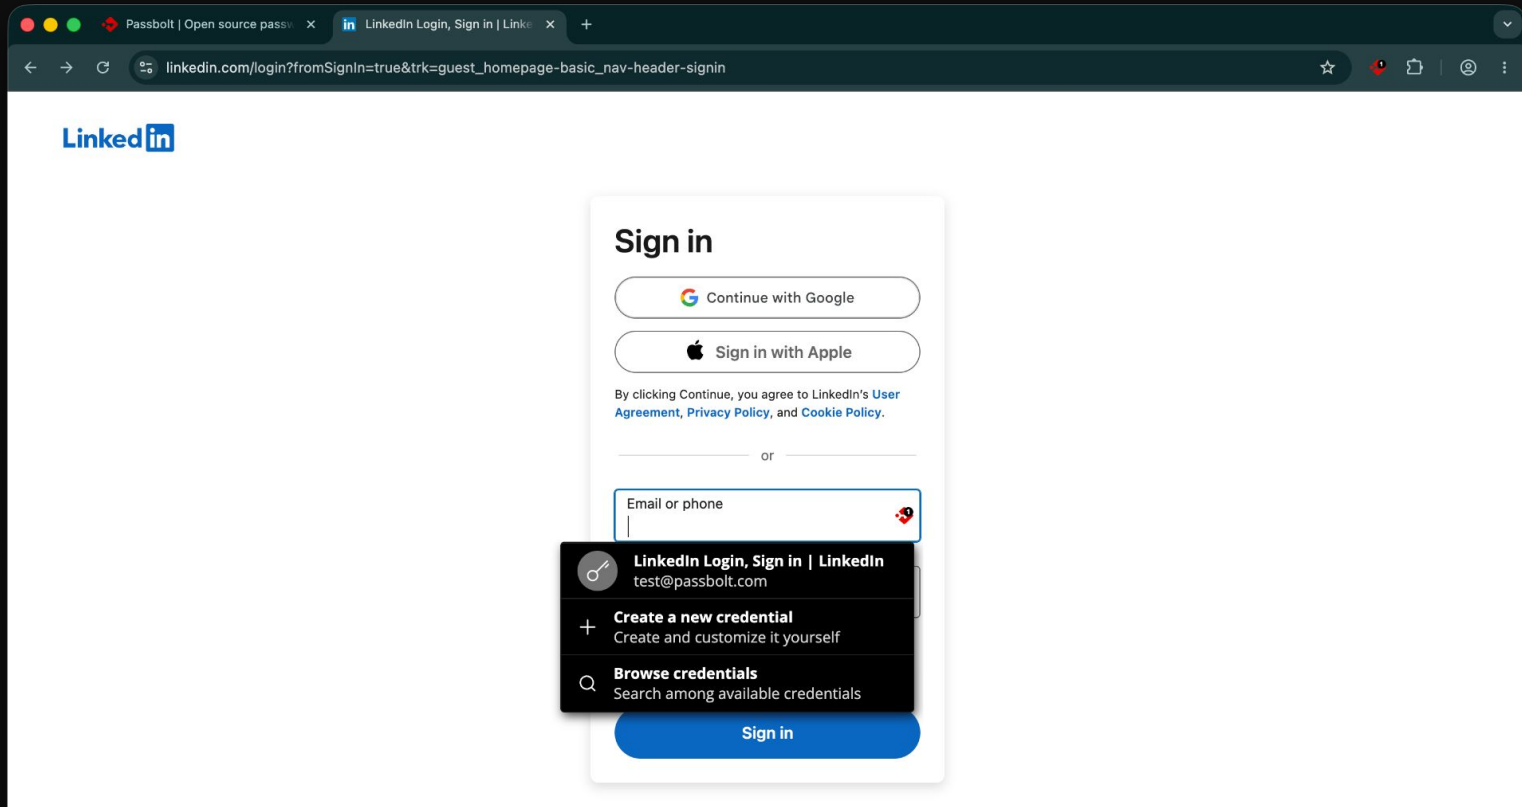

You can create password using the **quick access** or on the password workspace.

You can create a private folder for personal password.
Note that these cannot be recovered if you lose access to your account, as they are not shared with the Administrator.

You can share credentials with users directly, or by using groups.

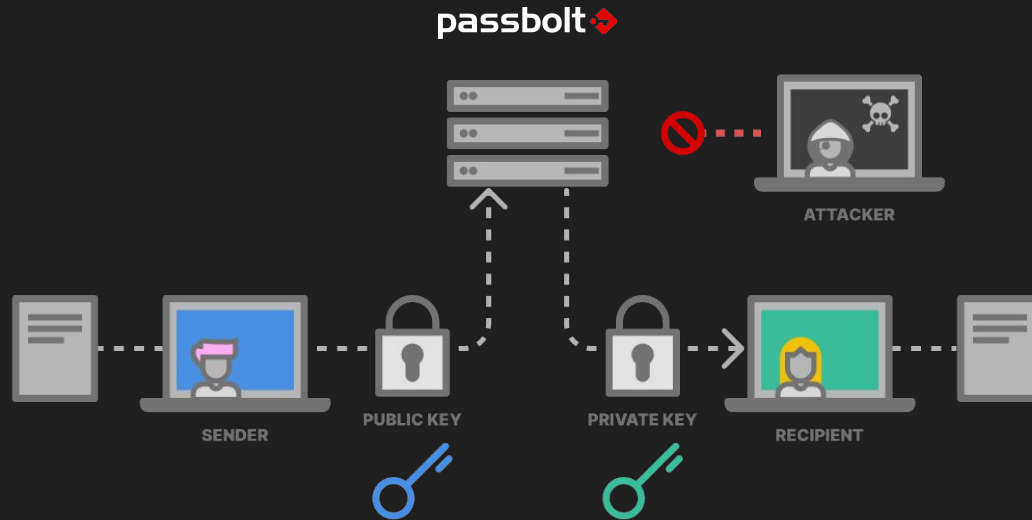

Passbolt icon appears directly **in forms** to help you generate strong passwords and securely autofill credentials.

How does it work?

The important bits...

Data in passbolt is **end to end encrypted**. It means it is transformed into a secret on your devices and then sent remotely. Data is encrypted using **keys**.

Both the **passphrase** and **key** are important. They never leave your devices, so you need to keep backups in order to set up new devices.

\$#@
%0&

Your passphrase
"Something you know"

Your Decryption Key

"Proves it's you & allows you to decrypt secrets"

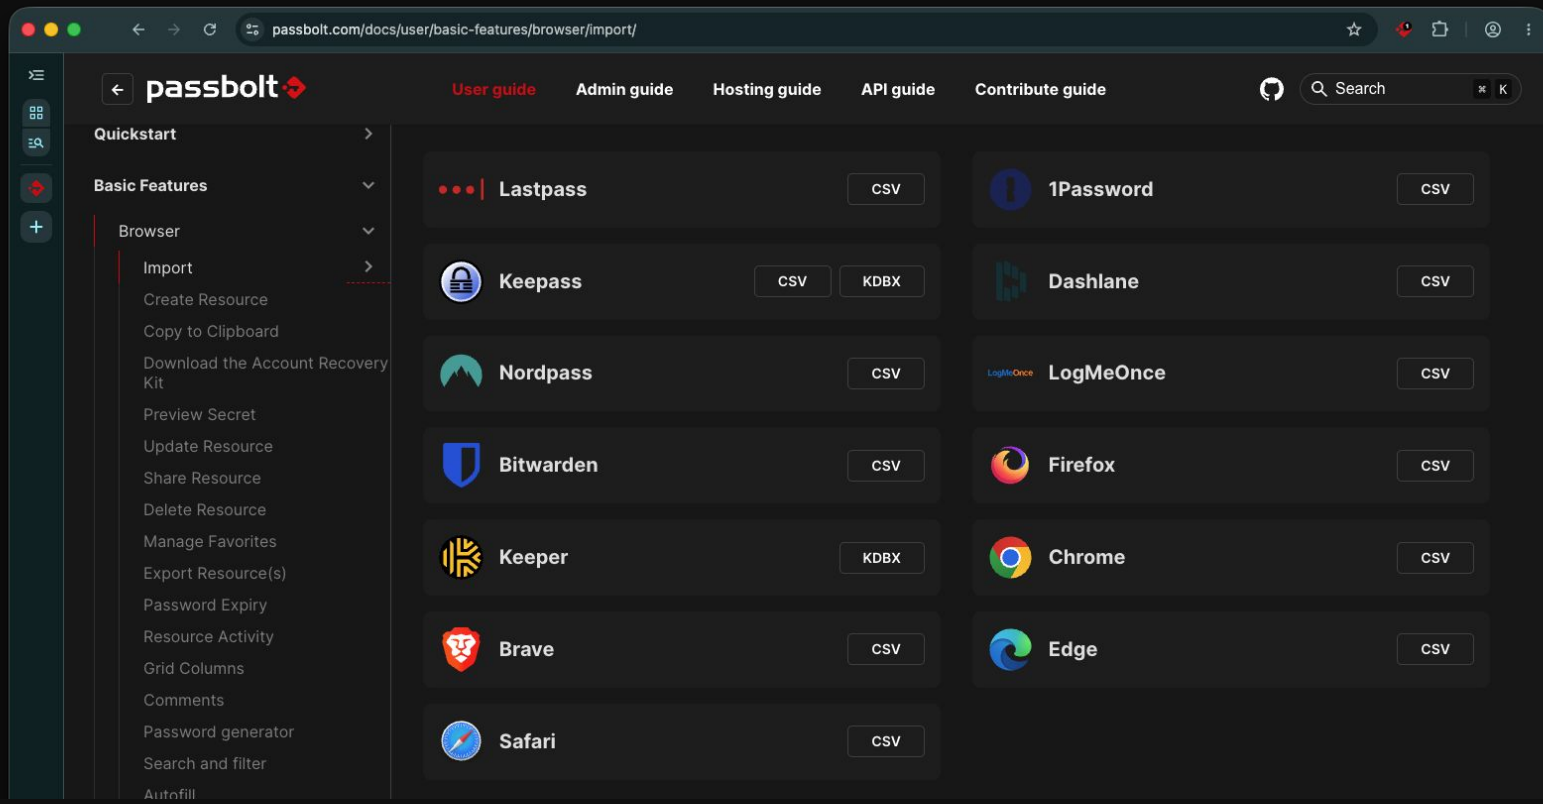

Your private key file
"Something you have"

Note: the private key file is also called "recovery kit".

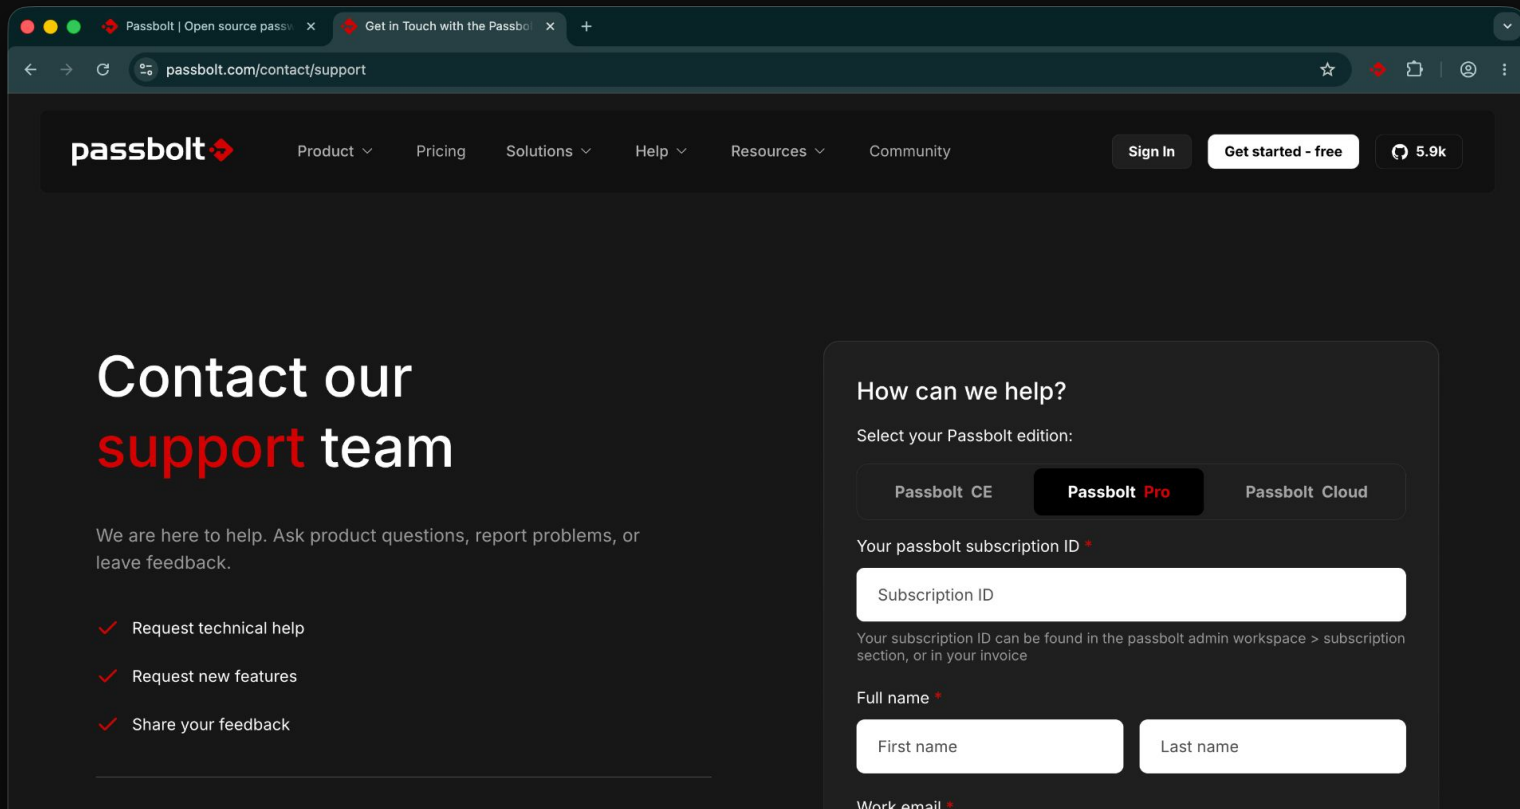

Useful resources

Where to learn more and get help

Browse the user guide. Learn more about Basic features on the official documentation.

If you are stuck you can always ask passbolt [community forum](#) or [tech support](#).

The screenshot shows a web browser with two tabs: 'Passbolt | Open source passw...' and 'Get in Touch with the Passbolt...'. The address bar shows 'passbolt.com/contact/support'. The page has a dark theme. The navigation bar includes the Passbolt logo, links for Product, Pricing, Solutions, Help, Resources, and Community, and buttons for Sign In, Get started - free, and a notification icon with 5.9k. The main content area has a heading 'Contact our support team' where 'support' is in red. Below the heading is a paragraph: 'We are here to help. Ask product questions, report problems, or leave feedback.' followed by three bullet points: 'Request technical help', 'Request new features', and 'Share your feedback'. On the right, there is a form titled 'How can we help?' with a dropdown for 'Select your Passbolt edition:' showing 'Passbolt CE', 'Passbolt Pro' (selected), and 'Passbolt Cloud'. Below this is a required field for 'Your passbolt subscription ID' with a text input box. A note states: 'Your subscription ID can be found in the passbolt admin workspace > subscription section, or in your invoice'. There are also required fields for 'Full name' (split into 'First name' and 'Last name') and 'Work email'.
